

AmeriCOM

Automatic Temperature
Monitoring 24/7
Wherever you are !

Modular Plug & Play
Communications options
for all Ameriscan 'RX/TX' range of
Temperature recorders

Ameriscan offers you various modular solutions for its temperature recorders. Off-loading of data can either be carried out whilst the vehicle is stationary, automatically when entering the depot, or in real-time during transport.

See below for the solution best suited to your operation:

Module 1: Stationary (Off-Line)

Data transfer via InfraCON / Bluetooth communication

- Off-loading of data for central data storage & analysis
- PC Programming of all recorder settings
- Suitable for smaller fleets with a few vehicles

Module 2: In the depot (Off/On-Line)

Data transfer via modern communication technology (AmeriDECT, Bluetooth, W-LAN)

- Full automatic data transfer when vehicle in range
- Automatic temperature/door alarm function whilst in range
- On-line Temperature data available whilst at the Depot
- Central data storage & analysis

Module 3: On the road (On-Line)

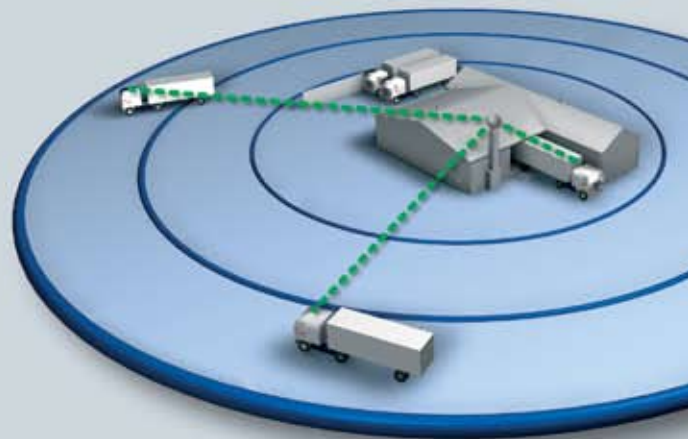

Data transfer via GSM/GPRS communication

- Automated data transfer
- Automated alarm function via mobile phone
- Real-time availability of data
- Central data storage
- Data access via AmeriBASE from any Internet enabled PC

All Ameriscan communication products are tested and approved to **R&TTE Directive 1999/5/EC**

Your advantages:

- automatic compliance with the new food industry quality standards including ISO9000, HACCP, 178/2002/EU New General Food Law
- increase your customer satisfaction
- a reduction of operating costs due to the risks associated with liability
- receiving a better grading with insurance providers
- reduction of labour costs
- quick amortization of the investment costs

You too can take advantage & benefit, from the know how of a World class market leader in the area of mobile Temperature recording for Conditioned & Controlled Atmosphere Transport.
