

## **AmeriTRACE**

Do you know where your valuable load is right now ?  
Is your route planning optimised to give you maximum efficiency ?

AmeriTRACE will support you in realising your needs !

A Plug & Play modular extension  
for all Ameriscan 'RX/TX' range of  
Temperature recorders

# AmeriTRACE

## The American system solution for tracking your vehicle and load

### AmeriTRACE

- Real time accurate positioning of your vehicles on a digital map, including the Temperature condition of your load.
- Historical routing available at your finger tips.
- Proof of on-time delivery to your demanding customers
- Positioning available in both 'Windows PC network' and in our 'AmeriWEB' interface, or if required in a combined solution.
- Give your customers remote access to Temperature data on their dedicated vehicles using AmeriWEB. The drag and drop function allows easy and secure management of all their data.

## American AmeriTRACE

AmeriTRACE is a Plug & Play extension module which can be used in combination with any American 'RX/TX' Temperature recorder, whether on first installation, or retro-fitted in the field afterwards.

A full system consists of a GPS receiver integrated into the Temperature recorder and connected to one of the American AmeriCOM communication systems, together with the AmeriBASE software.

## AmeriCOM modular solutions

- GSM/GPRS communication ✓
- Digital mid-range radio communication ✓
- Infra red/Bluetooth data transfer ✓
- Monitoring software with full automatic alarm functions ✓
- Software analysis and long term data storage ✓
